Profile

Final-year engineering student (Grenoble INP – Ensimag, information systems engineering), looking for a 6-month end-of-studies internship in full-stack development and agentic AI. On the job, integration of LLMs into a web ERP (Go, Nuxt, PostgreSQL): a custom agent runtime for tool calling, RAG and a chatbot that runs 90% of CRM actions, with human validation of sensitive actions. Works with REST APIs, microservices (Spring Cloud), Python (FastAPI), React, Docker and AWS, in Scrum; has foundations in Linux hardware-software interaction. Uses Claude and Codex daily while reviewing the code they produce. Experience in AI research: co-author of three papers accepted at CERC 2026.

Education

Grenoble INP - ENSIMAG 2026 – 2027
Academic Exchange – Information Systems Engineering *Grenoble, France*

Institut Universitaire Saint Jean – Saint Jean Ingénieur 2022 – 2026
Computer and Information System Engineering *Yaoundé*

- GPA: 3.49/4.0 - Top of the class from first through fourth year (17.99/20 average).

Experience

Software Engineering Intern – AI & Full-Stack – TWMicronics May 2026 – Sept. 2026
MAYA Enterprise – ERP multi-tenant | Go/Gin, NuxtJS, Postgresql

- Integrated LLM and embedding models via OpenRouter for RAG; built a custom agent runtime to take control of LangChain's ReAct loop: a tool-calling loop that persists every tool call and replays it on failure, with a tool-call queue executed by workers.
- Applied tenant data isolation and human approval gates on sensitive AI tool actions; 90% of CRM actions can be run through the chatbot as well as the UI.
- Built full-stack features with Go/Gin, Nuxt 4, and PostgreSQL.

Junior Backend Developer (NestJS & MongoDB) – ITIAD Sept. 2025 – Feb. 2026
IMMOA - Real estate platform

- Documented the API with Swagger/OpenAPI to enable parallel frontend and backend development.

Research & Publications

Co-author: "Three papers accepted at CERC 2026 (Galway, Ireland)" *Collaborative European Research Conference (CERC 2026), ATU Galway, Ireland*

- Cascade versus End-to-End Speech Translation for Tonal African Languages (2nd author, presented at the conference): defined a six-category error taxonomy and annotated 30 Igbo samples.

Projects

Lora – *Offline-First Agricultural Platform | Spring Cloud, Angular, React Native, Postgresql, Gemini* 2025 – 2026

- Architected a multi-repo Spring Cloud microservices ecosystem (Eureka, Config Server), deployed on AWS EC2.

AcadAi – *LLM-Powered Bilingual LMS Assistant (RAG + Quizzy) – Capstone Project* 2025 – 2026

- Designed a Python FastAPI RAG service with ChromaDB for bilingual institutional grounding.
- Deployed on AWS with Docker; led AI chatbot and component integration; supervised a TAM evaluation with 23 students (**91% adoption intent, mean scores > 4.2**).

Skills

AI & LLM Systems	LLM integration, LLM APIs (OpenRouter, Gemini API), RAG, vector search, embeddings, pgvector, tool calling, MCP (Model Context Protocol)
Languages	Java, Python, JavaScript / TypeScript, SQL, Go, C / C++
Backend & Data	Spring Boot, Spring Cloud (microservices), Node.js (NestJS), FastAPI, Go (Gin), PostgreSQL, MongoDB, API REST, Swagger/OpenAPI, JWT
Frontend	React, Angular, Nuxt / Vue.js, React Native, HTML / CSS
Software Engineering & DevOps	UML modelling, functional specification writing, architecture decision records (ADR), unit and end-to-end testing (Playwright), acceptance testing, GitLab/GitHub CI/CD, Docker, Kubernetes, AWS (EC2, S3), Linux, Scrum, JIRA, code review, AI-assisted development (Claude, Codex) with critical review of generated code

Languages

French : Native | English : Advanced (C1 – IELTS Academic 7.5)
